The Biogeochemistry of the Amazon Basin

Edited by

MICHAEL E. McCRAIN
Florida International University, USA

REYNALDO L. VICTORIA
Universidade de São Paulo, Brazil

JEFFREY E. RICHEY
University of Washington, USA

OXFORD UNIVERSITY PRESS

2001
1 The Relevance of Biogeochemistry to Amazon Development and Conservation.................................................. 3
  Michael McClain

2 General Characteristics and Variability of Climate in the Amazon Basin and its Links to the Global Climate System........................................... 17
  Jose A. Marengo & Carlos A. Nobre

3 The Atmospheric Component of Biogeochemical Cycles in the Amazon Basin........................................ 42
  Paula Arayuze

4 Soil versus Biological Controls on Nutrient Cycling in Terra Firme Forests........................................... 53
  Elvis Cuenca

5 Nutrient Cycling as a Function of Landscape and Biotic Characteristics in the Cerrados of Central Brazil........... 68
  M. Haridasan

6 Linking Biogeochemical Cycles to Cattle Pasture Management and Sustainability in The Amazon Basin............... 84
  Maucey B. Dias-Filho, Eric A. Davidson & Claudio J. Reis de Carvalho

7 Nutrient Considerations in the Use of Silviculture for Land Development and Rehabilitation in the Amazon........ 106
  Florencia Montagnani

8 Extractive Reserves and Participatory Research as Factors in the Biogeochemistry of the Amazon Basin........... 122
  Foster Brown, Karen Kainer & Eufran de Amaral

9 The Recovery of Biomass, Nutrient Stocks, and Deep-Soil Functions in Secondary Forests......................... 139
  Daniel Nepstad, Paulo R. S. Moutheke & Daniel Markewitz
10 The Interface Between Economics and Nutrient Cycling in Amazon Land Development ........................................... 156
Carl F. Jordan

11 Carbon Storage in Biomass and Soils ............................................................................................................... 165
Maria Fernandes, Paulo M. A. Graça, Carlos C. Cerri, Philip M. Fearnside, Brigitte J. Frigl & Mariela C. Piccolo

12 Terrestrial Inputs to Amazon Streams and Internal Biogeochemical Processing ............................................. 185
Michael E. McClain & Helmut Eisenbeer

13 Geo-ecological Controls on Elemental Fluxes in Communities of Higher Plants in Amazonian Floodplains .......................................................... 209
Maria Tereza F. Piedade, Martin Worbes & Wolfgang J. Junk

14 Biogeochemistry of Amazon Floodplain Lakes and Associated Wetlands ..................................................... 235
John M. Melack & Bruce R. Forsberg

15 Organic Matter and Nutrients in the Mainstem Amazon River .................................................................. 275
Allan H. Detal & John I. Hedges

16 Trace Elements in the Mainstem Amazon River ......................................................................................... 307
Patrick T. Seyler & Gerald R. Boaventura

17 Biogeochemical Processes on the Amazon Shelf: Changes in Dissolved and Particulate Fluxes During River/Ocean Mixing ........................................ 328
David J. DeMaster & Robert C. Aller
